

BYFORD AUDIO

PUNCH-12A

12" ACTIVE SUBWOOFER

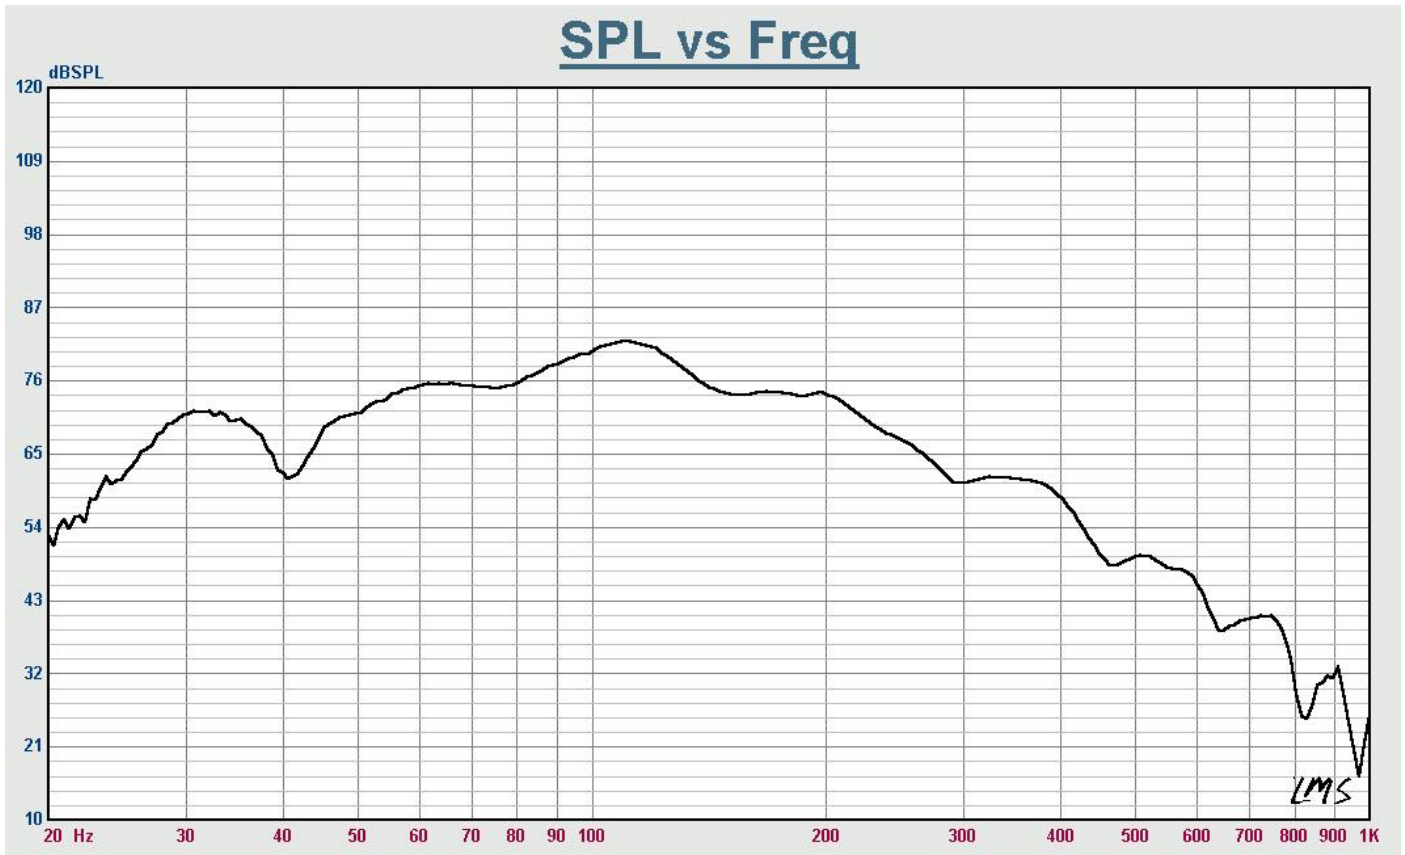

Exceptional Audio Performance

Description

This new PUNCH line of Subwoofers focuses on compact power and premium performance, we packed a lot into a small box that can only truly be felt in real life. No sound system is complete without a Subwoofer delivering the Punch of an action movie, the rich tones of a jazz solo, and the acoustics of a concert hall. Adding Byford Audio's PUNCH Series Subwoofer to a home theatre, media room, gym, bar, etc. will transform any listening experience.

- Powerful – Two drivers for deep bass. Each subwoofer model features one active driver with one 10" passive radiator.
- Style – The black PVC finish will complement any room or setting with metal grille.
- Compact – With the included passive radiator design we were able to maintain a smaller profile allowing these subwoofers to be hidden away.
- Flexibility – With three input options low level, XLR and high speaker level inputs to help connect with amplifier with or without subwoofer pre out & depending on the wiring available.
